Description

This is a very simple to use RFID reader module. With a built in antenna, the only holdup is the 2mm pin spacing (breakout board available below). Power the module, hold up a card, and get a serial string output containing the unique ID of the card.

Features:

5V supply

125kHz read frequency

EM4001 64-bit RFID tag compatible

9600bps TTL and RS232 output

Magnetic stripe emulation output

100mm read range

Dimensions: 25x26mm
